# Training that's built around you

CareerLabs is a career-focused training institute based in Madurai. We were founded on a simple belief — that practical, job-oriented training should be available to anyone willing to learn. We run small-batch programs so every student gets real attention, not just a seat in a classroom. Our courses are designed around what companies actually hire for, not just what looks good on a syllabus. From your first demo class to the day you receive your offer letter, we are with you at every step.

## What Students Say

Honest feedback from people who went through the Python program at CareerLabs.

★★★★★

"I had zero coding background when I joined. By week 4 I was writing actual Python scripts for automation. The pace was exactly right — slow enough to understand, fast enough to make real progress."

**Keerthana S.**

Now working as Python Developer

★★★★★

"The projects were what made the difference. I had three real GitHub repositories when I went for interviews and companies actually looked at them. That's what got me through the first round."

**Dinesh R.**

Backend Developer, Chennai

★★★★★

"I tried learning Python online for months and kept giving up. CareerLabs structured it in a way that finally made sense. The mentors don't just teach — they actually check that you understood."

**Priya M.**

Career changer, now Data Analyst
